Driven cybersecurity engineer with a passion for safeguarding company and user data. Expertise encompasses privacy-enhancing technologies, threat hunting, security operations management(MSOC), privacy regulations, and Pen testing. Proven ability to identify security & privacy gaps and implement effective mitigation strategies.

## Education

- Master of Cybersecurity — Brown University 09/2021 - 06/2023
- Bachelor of Mathematics & Bachelor of Economics — University of California, Davis 09/2017 - 03/2021

## Work Experience

**Cybersecurity Consultant (Blue team & Privacy) — EY, Hong Kong SAR 07/2023 - Present**

- Conducted Privacy Impact Assessments (PIAs) for 5+ international companies, identifying and mitigating data handling risks associated with GDPR, CCPA, PIPEDA, PDPO and PIPL compliance. Identified 100+ data handling gaps in total and advised on privacy-enhancing technologies to mitigate risks. Resulting in a 50+% reduction in identified risks and a 70+% improvement in regulation compliance.
- As a core member of the team launching three Security Operation service lines and the EY Greater China Managed Security Operation Center, I developed security software integrations that enhanced log monitoring, Privacy by Design, threat detection, and data visualization, resulting in a 25% efficiency gain. Identifying management inefficiencies, I then spearheaded the project management streamlining efforts after 6 months, focusing on architecture design, budget optimization, and UAT arrangement, resulting in reduced my manager's workload by 50%.
- Innovated privacy solutions from LLM models & Python. Developed and optimized internal chatbots and easy-report tools, resulting in a 25% increase in gap analysis and 50% increase in report generation efficiency.
- Enhanced mobile-app privacy practice while collaborating with legal teams. Strengthened data protection protocols, enforced least privilege access controls, and led to a successful launch in the regional app market.

**TMT Analyst, Intern — CSC Financial, Shenzhen, China 06/2021 - 09/2021**

- Analyzed sensor and semiconductor chip supply in the midstream of China's new energy vehicle market in groups and accurately predicted a 30-40% increase in vehicle production in Q4 2021.
- Utilized Python, Bloomberg, and Wind to update data sets related to semiconductors automatically.

**Risk Management, Intern — Ping An Bank, Shenzhen, China 06/2019 - 08/2019**

- Tested timeliness of bank risk system and refined report process to save 20% reporting time.

## Skills

- Privacy Technology – *Senior*
- Privacy Regulations – *Senior*
- LLM Training – *Junior*
- SOC architect – *Senior*
- Threat Hunting – *Senior*
- Data Mapping & DLP – *Senior*
- Splunk Enterprise – *Senior*
- Python – *Senior*
- V-Scanning & Pen Test – *Junior*

## Languages

- English – *Full Proficiency*
- Chinese – *Native or Equivalent*
- Cantonese – *Working Proficiency*

## Certificates

- OSCP+ — Offensive Security Certified Professional Plus
- CIPP/US — Certified Information Privacy Professional - United States
- CIPP/E — Certified Information Privacy Professional - Europe
- CIPT — Certified Information Privacy Technologist
- CIPM — Certified Information Privacy Manager
- OSWP — Offensive Security Wireless Professional
- Splunk Enterprise Certified Admin

## Interests

-  Chess - FIDE 2110
-  Snowboarding
